

FORM REQUEST SYSTEM

User Acceptance Test (UAT) — Sign-Off Sheet • Person & Material Gate Pass Workflow

UAT-001

Moriroku Philippines, Inc.
Internal Workflow Application

System: Form Request System (Gate Pass)

Environment: http://192.168.9.7/FormRequestSystem/

UAT Date: _____

Version / Build: July 2026 release

Database: gate_pass_system (MariaDB)

Prepared by: IT Department

This system replaces the paper gate pass. An employee files a request on the computer, the approvers sign it electronically, and the guard scans a QR code when the person or items go out and come back in. Please try each item below, mark **Pass** or **Fail**, write remarks if needed, then sign at the bottom.

TEST CHECKLIST

#	What to test (in simple terms)	Result	Remarks
1	Log in — open the system, enter your Employee ID and password, and reach your dashboard.	☐ Pass ☐ Fail	
2	File a Person Gate Pass — fill in destination, purpose, date and time out/in, then submit.	☐ Pass ☐ Fail	
3	File a Material Gate Pass — choose the authorized employee, list the items, attach a photo of the items, then submit.	☐ Pass ☐ Fail	
4	Request a company vehicle — tick "Company Vehicle Needed" and confirm the request goes to HRAD for vehicle assignment.	☐ Pass ☐ Fail	
5	Approve as Immediate Superior — open the pending request, review it, apply your e-signature, and approve.	☐ Pass ☐ Fail	
6	Assign vehicle and driver (HRAD) — pick the vehicle, driver, and schedule window; the booking appears on the calendar.	☐ Pass ☐ Fail	
7	Approve as President — company-vehicle and superior-filed requests reach the President for approval.	☐ Pass ☐ Fail	
8	PAS noting — after PAS notes the request, the status becomes Approved and a QR code appears.	☐ Pass ☐ Fail	
9	Reject with reason — reject a request; the requester sees the reason and gets a notification.	☐ Pass ☐ Fail	
10	Print the form — print the approved gate pass; the printout shows the details, signatures, and QR code.	☐ Pass ☐ Fail	
11	Guard scan — Time OUT — the guard scans the QR at the gate; the status changes to Outside (or items are released).	☐ Pass ☐ Fail	
12	Guard scan — Time IN — on return, the guard scans again; the status changes to Returned .	☐ Pass ☐ Fail	
13	Vehicle / truck schedule calendar — the calendar shows the fixed weekly schedules and new bookings correctly.	☐ Pass ☐ Fail	
14	Admin functions — the administrator can add/edit users, vehicles, and drivers, and view the system logs.	☐ Pass ☐ Fail	

Acceptance Decision — By signing below, we confirm that the items above were tested on the environment stated, and that the results are as marked.

☐ **Accepted** — ready for daily use ☐ **Accepted with notes** — usable; minor items to fix ☐ **Not accepted** — major items to fix, retest needed
