

User Manual - Requester

Who you are: a regular employee who needs to leave the premises, use a vehicle, or release items.

Creating a Request

1. Log in with your Employee ID and password.

(place the actual screenshot here)

4. Click Submit and wait for approval from your superior or the person in charge.

Checking Status and Printing

1. Go to the My Requests tab.

(place the actual screenshot here)

2. Check whether the request is Pending, Approved, or Rejected.

3. Once Approved, a Print button appears - this produces the formal gate pass form with the QR code and signatures.

(place the actual screenshot here)

Note: Tip: print only once the request is Approved. The QR code on the form is what the guard scans, so make sure the print is clear.
